amdocs

Q2/18 edition

open network
partner program newsletter

Dear partner,

Welcome to the inaugural Amdocs Open Network Partner Program newsletter.

Each quarter, we will be bringing you the latest news and updates on our partner ecosystem, including ONAP-related activities and what we're doing at key industry events.

Here's a preview of this edition's hot topics:

- **Amdocs Partner Business Forum 2018** is coming in two weeks!
- Launch of **Amdocs Autonomous Service Assurance**: our unique new way of assuring and operating the network and services
- Updates from the **Linux Foundation's Open Network Automation Platform (ONAP)** and the rapidly developing world of open source in telecommunications.

At Amdocs, we're proud to be working with partners across the entire spectrum of NFV infrastructure and applications to create innovative, integrated, multi-vendor use cases for our service provider customers. It's my hope that this newsletter will contribute to even greater collaboration between us all.

Ofer Farkash
Amdocs Open Network
NFV Partner Program Marketing Manager
