

Q3/18 edition

open network partner program newsletter

Dear partner,

Welcome to our second quarterly Amdocs Open Network Partner Program newsletter, bringing you the latest news and updates from our partner ecosystem, including ONAP-related activities and what we're doing at key industry events.

Here's a preview of this edition's hot topics:

- More than 100 representatives from 80 Amdocs partners recently participated in the Amdocs Partner Business Forum in Berlin, which presented excellent opportunities for relationship building and future planning.
- Amdocs helps Bell Canada implement ONAP-based network services automation.
- Intel's new 5G infrastructure reference design incorporates Amdocs NFV powered by ONAP for end-to-end service orchestration across multiple network domains

Amdocs Partner Business Forum 2018

EXFO, Juniper and VMware representatives participated in an engaging panel discussion, sharing their experiences as members of the Amdocs Open Network Partner Program.

To our partners who attended, and those who were unable, we look forward to seeing you at next year's event.

Amdocs helps Bell implement NFV-based network automation

Bell selected Amdocs as a strategic partner to help drive their network transformation to NFV, leveraging ONAP-based network service orchestration.
