Dear partner,

Welcome to our newsletter's summer edition. Whether you've been at work, on vacation or a combination of the two, I hope you've been able to enjoy the warm weather and the slightly slower pace that these months can bring.

Notwithstanding the above, as things at Amdocs are always hot, I'm pleased to bring you the following exciting updates:

- **SES** adopts Amdocs NFV platform
- **Microsoft** and Amdocs help service providers accelerate their cloud journey
- Amdocs boosts its Open 5G Portfolio with the acquisition of **TTS Wireless**
- **Fortinet** and Amdocs enable service providers to offer innovative virtual services
- How open source and open standards collaborate to accelerate next-gen networks
- Visit us at **SD-WAN summit 2019** and **SDN NFV World Congress 2019**

Thank you for partnering with us as together, we enable this new era of transformation!

Ofer Farkash
Amdocs Open Network
NFV Partner Program Marketing Manager

SES selects Amdocs NFV solution for network automation

SES, the world's leading global satellite operator, will use the Amdocs NFV orchestration solution to drive an automated, virtualized service creation and delivery environment.

Learn more

Amdocs and Microsoft help service providers drive growth and accelerate their journey to the cloud

Amdocs and Microsoft will collaborate across several domains, including data, AI, NFV & virtualized network services, IoT (including eSIM) and media.

Learn more

Amdocs acquired TTS Wireless to expand its 5G and mobile network services portfolio

Amdocs already delivers proven network services to some of the world's leading service providers. The TTS Wireless acquisition strengthens our commitment to be the leading independent provider of network services for 5G and open cloud networks.

Learn more

Fortinet and Amdocs enable service providers to offer innovative virtual services

Amdocs multi-domain NFV orchestration enables customers to decouple their network functions from the hardware appliance and deploy the broad portfolio of Fortinet security virtual functions at customer premises, data centers or on the public cloud

Learn more

How open source and open standards collaborate to accelerate next-gen networks

Alla Goldner reveals the different collaboration activities already in place between ETSI (3GPP SA5, NFV ISG, ZSM ISG) and ONAP at ONS Europe on Monday, September 23 at 17:00.
